Linux & Virtualization Infrastructure Expert

Over **20 years of hands-on experience** with critical infrastructures.
My day-to-day: **designing robust architectures**, automating whatever can be,
and stepping in to stabilize systems when it counts.

Profile

A system engineer at heart, I see myself as an **infrastructure Swiss Army knife**. My career has led me to build and run highly regulated, demanding environments (**Banking, PSF, Public Sector**) with one constant goal: keeping things simple and reliable.

Whether laying the foundation for a new architecture (**Linux, Virtualization, Cloud**), **automating large-scale deployments**, or **troubleshooting production crises**, I thrive on adapting quickly to the technical realities of any organization.

My work philosophy comes down to four core principles: **simplicity, resilience, automation, and knowledge sharing**.

Professional Experience

February 2026 - Present

Disruptive Minds – Co-Founder & Infrastructure Lead
Luxembourg

- Design and delivery of open-source virtualization architectures
- Helping organizations migrate from VMware to **XCP-ng / Xen Orchestra**
- Definition of infrastructure strategy, standards and technical governance
- Design of resilient, automated and cost-efficient platforms
- Advisory role on infrastructure modernization and sustainability

June 2025 - January 2026

R&D & Architecture Prototyping – Freelance Luxembourg

- Deep dive into the XCP-ng / Xen Orchestra ecosystem
- Design and testing of **VMware to XCP-ng migration scenarios**
- Automation, architecture prototyping and operational best practices
- Preparation of service offerings and go-to-market strategy

April 2024 - May 2025

Nøelse – Group Infrastructure Director
Luxembourg

- Led group-wide infrastructure strategy and technical governance
- Defined technical and security standards
- Supervised multi-environment platforms
- Designed and deployed an **XCP-ng / Xen Orchestra virtualization platform**
- Headed the exit from the VMware ecosystem toward **open-source virtualization**

April 2023 - March 2024

NSI Luxembourg (CEGEKA Group) – Senior IT Consultant / System Engineer
Luxembourg

- Provided consulting on system and cloud architectures
- Acted as a technical reference and mentor
- Promoted automation best practices
- Built an **XCP-ng / Xen Orchestra** lab environment
- Executed POCs, migration testing, and team enablement

July 2021 - April 2023

Mangopay – SysOps
Luxembourg

- Led the Linux migration from Ubuntu to **Red Hat (Satellite, IPA)**
- Centralized authentication using Azure Active Directory
- Designed the **AWS** landing zone
- Supported the on-premises to cloud transition

January 2021 - June 2021

Sogeti Luxembourg – Consultant
Luxembourg

- Streamlined **Red Hat Enterprise Linux** deployment processes
- Automated **system compliance**

October 2018 - December 2020

ING Luxembourg – Ops Engineer
Luxembourg

- Modernized the Red Hat infrastructure
- Implemented **Ansible Tower**
- Deployed an **Elasticsearch cluster** for logs, metrics, and APM
- Drove containerization initiatives

February 2017 - September 2018

EBRC – Senior System Engineer
Luxembourg

- Integration and operation of IT infrastructures for financial clients
- Technical architect role for a major banking customer
- **Highly available system architecture** design
- Automation using **Ansible**
- Monitoring, supervision and Tier 3 support
- Mentoring of junior system engineers

February 2016 - January 2017

atHome Group – Senior System Engineer
Luxembourg

- Production platform operations
 - Disaster Recovery solution deployment
 - Automated system management and deployments
 - Monitoring redesign
 - Federated authentication system design
 - **AWS environment** preparation
 - **Docker Swarm cluster** deployment
-

Earlier Experience

2013 - 2016

CTG Luxembourg PSF – System & Security Administrator / Application Support
Luxembourg

- Executed assignments for Clearstream and Banque Internationale à Luxembourg (BIL)
- Managed Linux administration and **hardening**
- Provided banking application support and infrastructure coordination

2001 - 2013

French Ministry of the Interior – System & Network Administrator
France

- Systems and network administration for **critical infrastructures**
 - Automation and large-scale monitoring
 - High availability and business continuity
-

Education

- **DEUG in Applied Mathematics & Computer Science**
University of Strasbourg (Louis Pasteur)
-

Certifications

- Red Hat Certified Specialist in Ansible Automation
 - Red Hat Certified System Administrator (RHCSA)
 - ITIL v3 Foundation
-
